### HMD2X2

### Low profile lightweight right angle drill with a two speed motor and a 2" x 2" capacity.

- Only 7-5/8" high easily fits into tight spots
- Lightweight at only 29 lbs (13.2 kg)
- Telescoping spline arbor for smooth cuts and minimal maintenance
- · Uses standard two flat shank annular cutters
- Pilot light for low light conditions and greater hole accuracy
- Two stage magnet. Engages full power only when motor is turned on which increases magnet life
- · Positive slug ejection
- · High torque two speed gear box
- · Carrying handle
- · Lift detector safety system
- Ratchet drive feed for confined spaces and convenience
- · Rear mounted controls
- Carrying case (20213) & ratchet included
- Two year warranty

# **Unmatched Power & Torque**

The HMD2X2 has a true 2" x 2" hole capacity while maintaining a constant height coupled with a two speed gearbox for improved tool life and high torque throughout the power band.

#### Power & performance for general metal fabrication and drilling holes in confined spaces

### HMD130

### Ultra low profile lightweight right angle drill for truck frames & general fabrication.

- Only 6-15/32" high for extreme tight spots
- · Lightweight at only 23.8 lbs (10.8 kg)
- Patented quill feed arbor for smooth cuts and minimal maintenance
- Uses RotaLoc Plus<sup>™</sup> cutters which requires no tools for installation or removal
- Pilot light for low light conditions and greater hole accuracy
- Two stage magnet. Engages full power only when motor is turned on which increases magnet life
- · Positive slug ejection
- · High torque gearing
- · Lift detector safety system
- Feed handle switches easily from side to side
- · Ratchet can be used in place of feed handle
- · Rear mounted controls
- · Carrying case included (08498)
- Two year warranty

# Get into the tightest of spaces and drill holes behind the wheels on truck frames

### HMD900

# Basic, no frills low cost economical magnetic drill.

- · Hidden motor cord
- High torque Hougen motor
- · Rigid dove tail slide
- Powerful magnet
- · Slot drive arbor system
- Many accessories are available for a portable machine shop including: drill chucks, countersink, vac-pad and more...
- · Uses "12,000-Series" or Copperhead carbide cutters
- · Lift detector safety system
- Two year warranty

# DRILL CHUCK & ADAPTER

Equip your drill with a 1/2" drill chuck for drilling small diameter holes using twist drills. Part No 09377 includes 1/2" Hougen drill chuck and arbor adapter.

### **HMD904**

### The drill of choice for fabrication. Lightweight, powerful, & versatile.

- · Hidden motor cord
- · Increased safety with less maintenance
- · Lower overall height
- Pilot light for low light conditions and greater hole accuracy
- Two stage magnet. Engages full power only when motor is turned on which increases magnet life
- · Slot drive arbor system with positive slug ejection
- Many accessories are available for a portable machine shop including: drill chucks, tapping, countersink, and more...
- · Lift detector safety system
- · Gravity fed coolant system
- · Carrying case included (09202)
- Two year warranty

#### Swivel Base adds even greater versatility:

- Precisely line up your pilot with the holes center location
- · One stroke lock and unlock handle
- Great for horizontal, overhead, tight areas, and getting out over another piece of steel

## HMD905

# Larger motor with two speeds adds increased strength and versatility.

- Powerful high torque Hougen motor and gears
- Two speed gear box 250 & 450 RPM
- Pilot light for low light conditions and greater hole accuracy
- Two stage magnet. Engages full power only when motor is turned on which increases magnet life
- · Available with or without the swivel base
- · Positive slug ejection
- Many accessories are available to turn your drill into a portable machine shop including: drill chucks, tapping, countersink, and more...
- · Lift detector safety system
- Integrated gravity fed coolant bottle
- Carrying case included (08077)
- Two year warranty

### Swivel Base adds even greater versatility:

- Precisely line up your pilot with the holes center location
- · One stroke lock and unlock handle
- Great for horizontal, overhead, tight areas, and getting out over another piece of steel

## HMD927 POWER FEED

### **Power Feed - Saves time and money** with less effort.

- Powerful high torque Hougen motor and gears
- Two speed gear box 250 & 450 RPM
- Pilot light for low light conditions and greater hole accuracy
- Two stage magnet. Engages full power only when motor is turned on which increases magnet life
- · Available with or without the swivel base
- Smart technology optimizes feed rate for increased tool life and excellent hole quality
- Single handle to engage power feed system
- Positive slug ejection
- · Lift detector safety system
- · Side mounted controls
- · Gravity fed coolant bottle included
- · Many accessories are available (manual mode only)
- Selectable manual/power feed mode
- Two year warranty

### HMD920

# Powerful workhorse with a large capacity and built in versatility.

- · Powerful high torque Hougen motor and gears
- Three speed gear box 250 / 450 / 700 RPM
- Pilot light for low light conditions and greater hole accuracy
- · Hidden motor cord
- Two stage magnet. Engages full power only when motor is turned on which increases magnet life
- Positive slug ejection
- Many accessories are available to turn your drill into a portable machine shop including: drill chucks, tapping, #2 Morse Taper Adapter, and more...
- · Feed handles quickly change from side to side
- · Lift detector safety system
- · Gravity fed coolant bottle
- · Carrying case included (09495)
- · Two year warranty

#### Swivel Base adds even greater versatility:

- Precisely line up your pilot with the holes center location
- One stroke lock and unlock handle
- Great for horizontal, overhead, tight areas, and getting out over another piece of steel

## **HMD918**

### Fabricate even more... Extended drill depth and reach for holes up to 6" deep.

- · Powerful high torque Hougen motor and gears
- Two speed gear box 250 & 450 RPM
- Pilot light for low light conditions and greater hole accuracy
- Pressurized coolant system for increased productivity & better coolant flow for deep hole drilling
- Includes extra arbor system for positive slug ejection when drilling holes up to 3" deep
- Two stage magnet. Engages full power only when motor is turned on which increases magnet life
- Many accessories are available to turn your drill into a portable machine shop including: drill chucks, tapping, #2 Morse Taper Adapter, and more...
- · Feed handles quickly change from side to side
- · Lift detector safety system
- · Carrying case included (08684)
- Two year warranty

### HMD934

# Industrial Duty drill for large deep holes with four speed gearing.

- · Powerful motor with two speed gear box
- Interchangeable gears for up to four speeds
- · Uses "12,000-Series" Cutters
- Integrated motor/gearbox design with guide rails for a rigid compact design
- Pilot light for low light conditions and greater hole accuracy
- · Positive slug ejection
- Integrated coolant system (optional pressurized system available 08446)
- Two stage magnet. Engages full power only when motor is turned on which increases magnet life
- Increased magnet holding power with impactor points
- · Lift detector safety system
- Two year warranty

| TWIST D  | RILL ADAPTER KIT        |
|----------|-------------------------|
| Part No. | Description             |
| 02608    | Twist Drill Adapter     |
| 03835    | 1/2" Twist Drill Bit    |
| 03837    | 7/16" Twist Drill Bit   |
| 03839    | 3/8" Twist Drill Bit    |
| 03841    | 5/16" Twist Drill Bit   |
| 03843    | 1/4" Twist Drill Bit    |
| 03845    | Twist Drill Adapter Kit |

Makes using twist drills quick and easy. Fits most any mag drill that will fit a 3/4" two flat shank. Adapter accepts a modified 118° twist drill with a 1/4" flatted shank that secures in adapter with a set screw.

### 82° CARBIDE-INSERT COUNTERSINK KIT

| 12962    | 13/16" Pilot   |
| 12963    | 15/16" Pilot   |
| 12966    | Countersink Ass'y w/Carbide Inserts  |
| 05465    | Replacement Torx Wrench  |
| 05467    | Carbide Inserts (10 pieces)  |
| 05779    | Carbide Inserts Wear Resistant (10 pieces)   |

Countersink provides 82° chamfers on holes quickly and easily. Two types of carbide inserts are available depending upon material hardness.

- Use 05467 inserts on mild steel, cast steel & malleable iron.
- Use 05779 inserts on structural steel, stainless steel, harder steels & non-ferrous metals.
  - WARNING: This product contains Cobalt, a chemical known to the State of California to cause cancer. For more information, go to www.P65Warnings.ca.gov

#### TAPPING ATTACHMENT KITS

| Part No. | Description  |
|----------|--|
| 20068    | For use with HMD904 & HMD905<br>(Slot Drive-includes adapter 08176)<br>1/2" Max. |
| 20069    | For use with HMD918/920 - 3/4"<br>Max. (Includes adapter 08179)                  |

**Required Collets for Tap Units:** 

For HMD904 & HMD905 (1/2" Max.)

Collets: 02495 for #6 thru 1/4" tap 02496 for 1/4" thru 1/2" tap

For HMD918 & 920 (3/4" Max.)

Collets: 10807 for #10 thru 1/2" tap 10808 for 1/2" thru 3/4" tap

Incorporates a planetary gear reverse with a 1:1 ratio. Reversing speed is equal to spindle speed so in-feed and out-feed of the unit can be employed without reversing motor direction. **Tapping** attachments are not recommended for use with swivel base drills.

# **HOUGEN® MAGNETIC DRILL ACCESSORIES**

| PIPE AD  | APTER KIT  |
|----------|--|
| Part No. | Description  |
| 02564*   | Chain Mount for use with<br>HMD904, HMD905, HMD918 &<br>HMD920 |
| 02582    | Additional chain - sold in 3 foot sections                     |
| 07283    | Master Link for additional chain                               |

These kits let you drill pipe and tubing with a minimum 3" (76mm) diameter and some convex surfaces. Kits quickly attach to your Hougen<sup>®</sup> Magnetic Drill and positive non-slip positioning assures centered hole location.

\*Minimum 3" dia. schedule 160, maximum 12" dia. schedule 160.

| VAC-PAD  | тм                     |
|----------|------------------------|
| Part No. | Description            |
| 05000    | Vacuum Base Attachment |

Vac-Pad<sup>™</sup> works with the HMD904, HMD905 on non-ferrous materials, diamond plate and materials with surface imperfections up to 3mm deep. Standard shop air provides 761 lbf surface holding power at 85 kpa. Safety switch shuts off drill motor if air pressure drops. (For current models of non-swivel base units only)

#### **SPINDLE ADAPTERS**

Spindle adapters are required for some Hougen mag drill accessories.

|----------|----------------------------|
| 10100    | 1" Arbor Extender Assembly |
| 10200    | 2" Arbor Extender Assembly |

When extended reach is necessary, Hougen offers 1" (25mm) and 2" (50mm) Arbor Extenders with a 1.310" (33.3mm) outside diameter that fit arbors using "12,000-Series" Cutters. Contact Hougen's Customer Service Department for more information about how the Arbor Extenders may help in your application.

### **RATCHET DRIVES**

| Part No. | Description                         |
|----------|-------------------------------------|
| 02449    | For use with Models HMD904 & HMD905 |

With the feed handles removed the Ratchet Drive is easily installed, allowing use of a standard ratchet handle for drilling in confined areas. *(Ratchet not included)* 

With the RotaLoc<sup>™</sup> Spindle Adapter you use RotaLoc<sup>™</sup> or RotaLoc Plus<sup>™</sup> Annular Cutters in virtually all Hougen<sup>®</sup> Portable Magnetic Drills or any other drill that also accepts "12,000-Series" Cutters.

# HOUGEN® "12,000-SERIES" CUTTERS - SIMPLY THE BEST

Hougen "12,000-Series" cutters were the original annular cutters invented over 35 years ago. With the most features of any annular cutter, "12,000-Series" cutters provide the best performance in the largest variety of materials. Compared to traditional tooling (twist drills, etc.) "12,000-Series" cutters can multiply your cutting speed by up to 3 times. And you get longer tool life, a more accurate hole, a better finish, with no burrs. Hougen cutters maximize feed rates because up to 10 cutting edges distribute the cutting load evenly. "12,000-Series" cutters convert a smaller area to chips, requiring less horsepower and thrust. The Hougen-Edge® feature is a patented tooth geometry that provides long tool life, less chatter, and extended resharpenability. The slug also offers a higher scrap value than loose chips.

Ground & Fully Fluted: Provides better chip evacuation, requires less h.p. & offers better performance in deeper holes.

I.D. Taper: Relief area between slug and cutter. Reduces horsepower and improves slug ejection.

### Why use Stack-Cut Geometry?

U.S.A.

Hougen "12,000-Series" Annular Cutters with a Stack-Cut tooth geometry must be used whenever two or more plates are being drilled simultaneously. When drilling multiple pieces with traditional cutters, after the first piece is drilled, you need to stop and remove the slug before continuing on thru the second piece. Not a problem with stack cutters. Drill straight thru without stopping.

Most sizes of "12,000-Series" cutters are available from stock with stack cut geometry. All sizes are available by special request with stack-cut geometry. Hougen's Technical Service Department should be contacted whenever special tooth geometry and applications will be necessary.

Hougen can design & manufacture custom cutters and tools for your specific application. Call or email us today...

> (810) 635-7111 info@hougen.com

### **Deep Hole Drilling**

After years of design and testing, the game has changed for deep hole drilling with the NEW Quad Helix Flute "12,000-Series" Cutters. The new design improves chip flow from the bottom recesses of the cutting teeth. Reducing chip build up, time to clear the chips and increasing productivity. The one-of-a-kind continuously expanding flutes act as an auger to more efficiently extract the chips. Quad Helix Cutters feature the time proven Hougen-Edge® tooth geometry, they are resharpenable and of course, made in the USA.

- Cuts holes faster
- Longer tool life
- Lower cost per hole
- Precision tooth geometry
- For the widest range of materials
- Resharpenable

For use with Hougen<sup>®</sup> Portable Magnetic Drills and many competitive models on materials up to 6" thick. They are made from hardened M2 high speed steel and are precision ground for excellent performance throughout the cut and long tool life. "12,000-Series" cutters have a 3/4" dia. double-flatted shank and for extended tool life and lower cost per hole. "12,000-Series" Cutters are resharpenable. Modified end tooth geometry is also available for drilling in stacked plate applications.

All Cutters are available with **stack geometry**. To order: add 'S' to end of part no. ie...12226S. (Some sizes may take 7-10 days. Call for availability).

### "12,000-SERIES" TAP DRILL SIZES

A clean, accurate hole helps to make tapping an easier task. You can achieve that task easily with these tap drill size "12,000-Series" Cutters. Kit #12007 contains five popular sizes of tap drills.

| Cutter Dia.<br>(Inches) | Decimal<br>Equivalent | Thread     | Parl<br>1" D.O.C. | No.<br>2" D.O.C. |
|-------------------------|-----------------------|------------|-------------------|------------------|
| Use with                | -                     |            | 10531             | 10532            |
| 7/16                    | .4375                 | 1/2-13     | 12114             | 12214            |

### PILOTS - "12,000-SERIES"

The pilot serves three functions when used with "12,000-Series" cutters in a portable magnetic drill; 1) Locate the holes center point, 2) Initiate coolant flow to the center

19

of the tool, 3) Eject the slug at the end of the cut. Always use a sharp pilot for best results.

# **ROTALOC PLUS™ ANNULAR CUTTERS**

RotaLoc Plus<sup>™</sup> Annular Cutters are designed for the Hougen<sup>®</sup> HMD130 Low Profile Drill. They're made of M42 high speed steel, feature Stack Cut geometry for penetrating multiple plates in a single pass and are designed for a full 1" D.O.C. They feature a 5/8" bayonet-style shank mounting for fast change out, with no tools required to install. For optimum cutter tool life and cutter efficiency use Hougen<sup>®</sup> Slick-Stik<sup>™</sup> Lubricant or RotaGel<sup>™</sup> Cutting Lube.

# **COPPERHEAD™ CARBIDE TIP CUTTERS**

Copperhead<sup>™</sup> Carbide Tip Cutters offer extended tool life on abrasive, tough-to-cut materials and in high-speed mag drills. The unique Hougen design includes a special tooth geometry that helps maintain a better chip flow than other brands. Copperhead Cutters are available in fractional & metric sizes with the Fusion2<sup>™</sup> shank. The shank allows for cutters to be used in Hougen drills and competitive models utilizing the one-touch arbor system. Using the set screw arbor system can result in up to **2x** the tool life as tool-less systems.

## **STEP DRILLS**

Hougen<sup>®</sup> Step Drills allow the convenience of drilling multiple size holes using one drill bit. These tools offer improved tool life because they are made from premium Cobalt M42 HSS and TiN coated. The Hougen split point quickly starts the hole and the double angled flutes increase penetration speed. For use in sheet metal, aluminum, stainless steel and some plastics.

# CARBIDE HOLCUTTER™ FOR MATERIALS UP TO 1" THICK

Carbide Holcutters cut smooth, fast, burr-free holes in all types of materials and are designed for day in & day out use. They feature a shoulder stop to prevent over penetration of the work piece and an ejector spring helps with slug ejection. Tungsten carbide provides long tool life and smooth cutting action. Dramatically outlasts bi-metal hole saws and step drills. For materials up to 1" (25mm) thick. (All cutters include arbor, pilot drill & spring.)

### HOLCUTTER™ FOR SHEET METAL AND THIN MATERIALS

HSS Holcutters last **10x** longer and cut **3x** faster than bi-metal hole saws or twist drills. All cutters use a single arbor, with a patented Quad-Lead

thread mounting system. For materials up to 1/8" (3.2mm) thick.

### HOLCUTTER™ SPEED REDUCER

Featuring a 4:1 gear ratio, the Holcutter<sup>™</sup> Speed Reducer mounts directly to your 1/2" drill and maintains torque while reducing RPMs for 1" and larger HSS Holcutters. Cutters mount to Speed Reducer with no arbor required.

## **TORNADO II™ PAINT SHAKER**

The lightweight Hougen<sup>®</sup> Tornado II<sup>™</sup> Portable Paint Shaker can be used on benches or the floor without bolting it down. Blending cycles can be set to numerous time intervals via the convenient up-front control panel. Three-axis orbital action assures complete mixing of gallons, pints, quarts or aerosols. Easy to use four-point clamping securely holds containers while minimal moving parts provide quiet operation. Weight: 24lbs (10.9 kg) 26" H x 15-3/8" W x 11-1/2" D (660mm H x 391mm W x 292mm D) Can/Paint weight limit: 11 lbs (5kg)

# PUNCH-PRO<sup>™</sup> PUNCH MORE HOLES, MORE OFTEN, IN MORE PLACES, IN LESS TIME

You'll punch more holes, more often in more places all in less time using a Hougen<sup>®</sup>-Ogura<sup>™</sup> Punch-Pro<sup>™</sup> Electro-hydraulic Hole Puncher because of its lightweight and single body construction. Unlike hole punchers with separate hydraulics that require hydraulic hoses, the Punch-Pro<sup>™</sup> series has a unique single-body construction meaning there is only a power cord to deal with.

Punch-Pro<sup>™</sup> models require less punching tonnage than traditional hole punchers because of an exclusive punch and die design. Five Punch-Pro<sup>™</sup> models offer punching diameters from 1/4" up to 15/16" thru material thicknesses from 5/64" up to 1/2". Punching beats drilling.

A Punch-Pro<sup>™</sup> dramatically reduces your hole-making costs over conventional drilling methods.

*Time Savings* — Punch-Pro<sup>™</sup> users have documented increases in productivity over other holemaking methods. One user stated that he had achieved a 75% time savings over the old method of using twist drills.

*Fast Cycle Times* — Punch clean and accurate holes in as little as 2 seconds. A single trigger actuates the punch while an exclusive auto-return mechanism returns to the punch starting position.

**Ease Of Handling** — Single body lightweight construction starting at 17.4 lbs make these units easy to handle and move with only a single power cord and no separate hydraulics. And operator fatigue is reduced since the Punch-Pro<sup>M</sup> does all the work.

Accuracy —

Eliminates the need to pre-drill or prepunch. To confirm the punch position, simply jog the punch down to the center mark for the hole location. A convenient release valve allows ease of repositioning if required.

Punches are designed to punch mild or structural steel. For other materials contact Hougen Technical Service 810-635-7111.

# 76000PR

# 75002.5PR

Our 18V cordless hole puncher is our smallest and most lightweight punch. The unit can quickly put holes through quarter inch material. At just 17.4 lbs (7.9 kg), the 76000PR is easy to move around or carrying for variety of applications. Punch round and oblong holes in materials from up to 1/4" (6.4mm) thick. Easily confirm the hole position with the jog down feature. Punch automatically returns to the starting position after the punching cycle is complete. Or if punch resists returning to the home position, use the power retract. 15/32" (12mm) punch (76567) & die (76587), tool kit, battery, charger and carrying case are included.

Designed for applications typically done with hand held twist drills. At just 24.9 lbs (11.3 kg), the 75002.5PR is easily handled in all types of punching applications, on site or in the shop. Punch round and oblong holes in materials from up to 1/4" (6.4mm) thick. Its 2-3/8" (60mm) throat depth provides excellent reach and versatility. Easily confirm the hole position with the jog down feature. Punch automatically returns to the starting position after the punching cycle is complete. Or if punch resists returning to the home position, use the power retract. Work stand, foot switch, 7/16" (11mm) punch (76339) & die (76319), tool kit and carrying case are included.

Our heaviest duty model, the 75006PR, develops 26.9 tons pressure and will produce round holes up to a maximum of 15/16" (23.8mm) diameter and punch through a maximum thickness of 1/2" (12.7mm) material in approximately 4 seconds. It has eyebolts on both sides for easy attachment to a lift assist or a counter-balancer for improved ergonomics. Like all Punch-Pro models, its single body design makes it easy to use anywhere. Easily confirm the hole position with the jog down feature. Punch automatically returns to the starting position after the punching cycle is complete. Or if punch resists returning to the home position, use the power retract. Work stand, foot switch, 13/16" (20mm) punch (76366) & die (75605) and tool kit are included.

Punching capacity data is based on mild steel of 65,000 psi tensile strength.

Punches are designed to punch mild or structural steel. For other materials contact Hougen Technical Service.

# **Model Dimensions**

### Special Notice Regarding Punches and Dies

The exclusive Hougen<sup>®</sup>-Ogura<sup>™</sup> punch geometry and die clearances reduces press tonnage requirements and increases portability. Premium heat treated materials help achieve tool life increases of two to two and a half times that of other manufacturers and generic copies. The use of incorrect punches or dies could result in unacceptable performance or damage to the machine and may void the warranty. Hougen Manufacturing Inc. recommends the use of only genuine Hougen-Ogura punches and dies.

### **TECHNICAL TIPS**

- #1 cause of broken or prematurely dull cutters is too slow of feed rate. Slower feed rates will not add life to your cutter but actually reduce the cutter's life. Use firm steady feed pressure throughout cut.
- Always make sure to clear all chips from your cutter before starting the next hole.
- Make sure support system for drill arbor is in place and not worn out. If using on a drill press, a support system must be used.
- For harder material use Hougen's Copperhead<sup>™</sup> Carbide Tip or Hougen Xtreme Cobalt<sup>™</sup> Cutters.
- Make sure mag drill is on a clean work piece and securely attached. Uneven or large build up of debris can cause drill slippage. Material must be at least 3/8" thick. Painted material can also be troublesome, paint buildup does not allow magnet to hold securely.
- When slug ejection becomes unreliable or tool resists cutting, resharpen or replace your cutter.
- Always use coolant when drilling. For best results use Hougen's Slick-Stik™, RotaGel™ and RotaMagic™ cutting lubricant.
- For best performance always maintain your drill as instructed in your operator's manual.
- Always observe standard and specific safety instructions.

### **COMMERCIAL/INDUSTRIAL LIMITED WARRANTY**

Hougen Manufacturing, Inc. warrants its Portable Magnetic Drills, Trak-Star Rail Drills, and Tomado II Paint Shakers for two (2) years, Electro-hydraulic Hole Punchers for one (1) year and it's Husqvarna Saw and other products for ninety (90) days from date of purchase against defects due to faulty material or workmanship and will repair or replace (at its option) without charge any items returned. This warranty is void if the item has been damaged by accident or unreasonable use, neglect, improper service, or other causes not arising out of defects in material or workmanship. No other expressed warranty is given or authorized. Hougen Manufacturing, Inc. disclaims any implied warranty of Merchantability or fitness for any period beyond the expressed warranty and shall not be liable for incidental or consequential damages. Some states do not allow exclusion of incidental or consequential damages or limitation on how long an implied warranty lasts and, if the law of such a state governs your purchase, the above exclusion and limitation may not apply to you. This warranty gives you specific legal rights and you may also have other rights which vary from state to state.

To obtain warranty service, return the item(s), transportation prepaid to your nearest Factory Authorized Warranty Service Center, or to Hougen Manufacturing, Inc., 3001 Hougen Drive, Swartz Creek, MI 48473.

This warranty is in lieu of any other warranty, expressed or implied, including any warranty of merchantability or fitness for a particular purpose.

To compute RPM's for cutting speeds other than those shown, either select two speeds from the table that add up to the speed desired and then add their RPM's, or select a factor which, when multiplied by one of the speeds in the table, gives the desired speed and multiply its RPM by the same factor.

Examples: To find the RPM for a 1" diameter cutter run at 150 SFM --

- 1) Add RPM's for 100 SFM (382) and 50 SFM (191) = 573 rpm
- 2) Or multiply the RPM for 50 SFM (191) by a factor of 3 = 573 rpm

# Service • Integrity • Reliability

At Hougen<sup>®</sup>, we want you to make more holes, more often, in more places all in less time... profitably. To that end, Hougen engineers are constantly striving to bring you the right tools.

Hougen portable magnetic drills and annular cutters are just one of a family of Hole making products that can be found on the production floor or the job-site.

Ask your distributor about how Hougen's fine products can improve your Hole making productivity.

# **Hougen® Quality**

No matter the tool, we stand behind our product 100%. If ever you are not satisfied with one of our products, let us know and we'll work to make you happy.

# STAY UP TO DATE! Follow for the latest tips, how to's & product info
